

Wood Windows WAREHOUSE

Wood Windows Warehouse of Emeryville custom manufactures wood windows. We reproduce and install traditional or modern styles for complete unit replacement, or repair and restore existing windows and sashes to their former beauty. Whether the style is double-hung, awning, casement, sliding or arch, **WWW** efficiently produces high quality and beautiful windows which help maintain property values. Custom screens are available, also.

In addition, **WWW** custom designs and builds attractive and durable wooden doors; interior and exterior, for replacement or complete unit in jamb. Front doors, French doors, solid wood, glass, panel and arched doors are among the many styles available. Also, we are a comprehensive source for many exotic woods for special project needs.

Bring us samples, drawings and photos and we will handcraft doors and windows to your exacting specifications. No job is too big or small for our custom Emeryville workshop. **WWW** builds to suit and satisfy.

It's a family tradition at **WWW** to keep the historic wooden window and door preservation market alive in a modern world. Restoration of your property to your satisfaction is our operating policy. We have direct experience working with residential housing, commercial, government and civic buildings, and bid very competitively to get your business and establish a trusting, long-term relationship.

As our business increases each year, and our product finds its way out into the marketplace, I am very proud of our employees and the progress we have made. Please contact me directly, send a fax or e-mail, or just walk in for a tour and a free estimate on your project.

One year warranty is offered on custom wood windows and doors, and a 10 year warranty comes with insulated glass. (not including installation labor)

We are a licensed California contractor, familiar with all installation requirements.

Sincerely,

Mario Galeana, *President*
